## Programming

My first programming language it's a Delphi. In a school I learn Delphi and Pascal, build on it base a first scripts and programs. In a 10 - 11 classes I was programming at this languages.

After the school, in University I was learn a C++ and C, but don't like it. Also was used Pascal and Assembler in education process.

On last University course I was start programming on Python and create my first projects. After that and to today I was writing on Javascript, Bash, Jekyll and Jinja.

Simple table my experience in programming:

Type	Name	Knowledge Level	Comments
programming language	<b>Python</b>	4/5	<i>Version: 2.7, 3.7 Many <a href="#">personal projects</a> and working experience.</i> I was learning this language, use for a common tasks and build a personal project on it, implementation custom testing framework and using for a testing.
programming language	<b>JavaScript</b>	2/5	I training on my standalone (Electron-like) projects where used it like a part of script (Eel)
programming language	<b>sh (Bash)</b>	4/5	I use it everyday in Ubuntu
programming language	<b>Pascal/Delphi</b>	3/5	I was use in school and schools projects
programming language	<b>Assembler</b>	2/5	I was use it for my university laboratory and practice works
library	<b>telebot/pyTelegramBotAPI</b>	4/5	Used it in my <a href="#">Telegram Bots projects</a>
library	<b>pytest</b>	4/5	Making own test framework using pytest and testing scripts on it.
library	<b>appium</b>	4/5	Debugging and testing Android devices on 8 and 9 versions. Making scripts using it and ADB tool.
library	<b>requests</b>	4/5	Used it in many projects where need access to REST API and GET/POST access to web-pages
library	<b>tkinter</b>	3/5	I was use it for create GUI in <a href="#">Kiwi Tickets Parser</a>
library	<b>re</b>	4/5	Regular expressions inside the Python can be need in some algorithms
library	<b>sklearn</b>	1/5	I was use it for <a href="#">University project about Machine Learning</a>

Type	Name	Knowledge Level	Comments
framework	Jupyter	✓	Used: <i>matplotlib, Pandas</i> . I was use Jupyter and Jupyter-Lab for build markdown-python notebooks and presentations (Rise)
framework	Bootstrap 4	✓	Just understood how use it and have practice experience
framework	Jekyll, Pelican	4/5	Tried build personal site on it, last of it use now for this site
framework	Eel	3/5	Electron-like framework for Python, I was use it for a several private projects
data interchange	JSON, XML	✓	I was use it for configurate a environments, save data, in REST API's and parse it
query language	SQL	4/5	I was use in my projects for make a query's to DB (PostgreSQL, SQLAlchemy)
query language	WebQL	4/5	I was work on commercial projects on it
markup language style sheet	HTML, CSS	4/5	I was use for myself private projects-sites and for commercial projects-sites (sample, gwaramedia.com.ua )
markup language	Markdown, reStructuredText	✓	Just text markup language
tool	RegExp	5/5	I was use it in commercial projects
IDE	VS Code	✓	Migrated on it from Atom, Notepad ++ and Visual Studio *. Added Vimium and many extensions
ideologies	VIM	4/5	Just use a VIM <3
ideologies	Functional paradigm	✓	Basic knowledge for programmist today
ideologies	OOP	✓	Less experience, don't worked on big projects
metodologies	Agile	✓	Using in a commerce software developing.
metodologies	Kanban	✓	Scrum and same else methodologies was used on some projects and in a civic activities

Type	Name	Knowledge Level	Comments
instruments	Jira	✓	I was use IT on commercial projects
instruments	Jama	✓	Requirements management system in commercial projects
instruments	Trello	✓	It's easy :D
instruments	GitHub	5/5	I love it! <3
instruments	cron	✓	Used for run programs in loop.
instruments	grep	✓	Used in bash scripts for extract info in console.
instruments	adb	✓	Android debugger tool with UIAutomator and etc.

\* - used too small time or once..

## Writing

### Poems or start

I was start train at 2013 year the writing skill, when I was started wrote the poems. Some years ago I was return to this occupation and sometimes wrote new. So now I have more than one hundred poems.

### Books

I try wrote book twice, but in this time first book was containing on 20%, second - on 10%.

This books it's a novels about human relations.

Part of second book named "UNWER" was publish in category [#Books](#).

### Articles

On university time I fully plunged to a social-civic activities, so start wrote a post and articles.

My first platform be a [Medium](#) and after I migrate to [my Facebook personal page](#).

In the activities I was have privilege to publish in a theme sites. For example articles:

- article on StudWay where first part about me - "[Activists which you should subscribe](#)";
- my first article for StudWay - "[I talk to you, freshman](#)";
- my second article for StudWay - "[How will can remember you in a higher education institution, except for the name on the graduate list?](#)";
- my third article for StudWay - "[Students and bureaucracy will save universities](#)"

\* - all articles was published on ukrainian language.

---

## Civic activity

I been a Leader of students self-government in Kharkiv National University of Radioelectronics and was have access and been a helper / protection / participant / organiser to many students projects and initiatives.

And too, I been a participant next non-goverment organisation:

- "Fundation of Regional Initiatives" in Kharkiv;
- National students council of experts in higher education quality;
- Kharkiv regional students council;
- Students council at Ministry of information politics of Ukraine;
- "Ukrainian Student's Cluster" initiative.

More info about my civic activities you can find on [my Facebook page](#).
